

# **ORP Sensor Cube**

- · Fully compatible with büS systems and a wide range of further analysis sensor cubes
- Modular sensor cube for hot swap (exchange during operation)
- Minimal sample water flow needed •

Product variants described in the data sheet may differ from the product presentation and description.

## Can be combined with

Type 8905 Online Analysis System

Type 8920 Bürkert Communicator 3 MUNICATOR

#### **Type description**

The device is an ORP measurement sensor. It is used within the Online Analysis System Type 8905 by being plugged into a spare fluidic backplane slot.

ORP value is one of the most important water parameters - it is an indicator for the activity of the disinfectant, with no measure of the applied dose but with measure of the remaining residual.

The electrical and fluidic connections are made via the connection panel of the system. The sensor cube is communicating with the system via büS, allowing fully automatic login to the online analysis system. If the sensor is plugged into the system, it automatically logs on to the büS and can be parameterised according to customer requirements.

# 1. General technical data

Product properties	
Material	
	e compatible with the fluid you are using.
Detailed information can be found in chap	pter "2.1. Chemical Resistance Chart – Bürkert resistApp" on page 4.
Housing	PPE+PS
Lever	Zamak
Seals	EPDM
Dimensions	Detailed information can be found in chapter "3. Dimensions" on page 4.
ORP sensor	Platinum potentiometric 2-electrode measuring cell
Electrolyte (reference electrode)	3 mol KCl
Compatibility	With Online Analysis System Type 8905 (the electrical and fluidic contact is made via backplane system.) Detailed information can be found in the data sheet of the online analysis system, see <b>data sheet Type 8905</b> ▶ for more information.
Measuring range	2000+2000 mV
Maintenance	12 months nominal, depending on the water quality
Performance data	
ORP measurement	
Measurement deviation	±10 mV
Response time (t <sub>90</sub> )	<10 Sek.
Electrical data	
Operating voltage	24 V DC through the backplane of the system Type 8905 via büS
Power consumption	0.8 VA
Media data	
Fluid	Water without particles: drinking water, industrial water
pH range	рН 4рН 9
Sample water	
Temperature	+3+40 °C (+37+104 °F)
Pressure	PN3
Flow rate	>6 l/h
Process/Port connection & communication	ation

# 3. Dimensions

# Note:

Dimensions in mm

# 4. Product installation

## 4.1. Installation notes

## Note:

- The sensor cube is designed for use with the online analysis system, Type 8905. The sensor cube is simply plugged into the backplane in Type 8905.
- It is also possible to mount the backplane individually on a DIN rail.

See data sheet Type 8905 ▶ Online Analysis System for more information.

#### Installation examples

 Product mounted in a housing for the Online analysis system
 Product without housing mounted of the backplane on standard rail (TS35).

 • ORP sensor cube Type MS04
 • Housing Type 8905 with display Type ME21 and controller Type ME25

Rail (TS35)

## 5. Product design and assembly

## 5.1. Product features

## Product without housing

No.	Element
1	Slot micro-SIM card (for configuration data)
2	Electrical interface
3	Guide pins
4	Fluid connections
5	Housing of the external reference electrode
6	Lever to:
	<ul> <li>lock / unlock the product</li> </ul>
	carry out maintenance operations
7	Push button for unlocking
8	Maintenance position
9	Sensor cube Status LED
10	Unlocked position
11	Locked position
